Forecast for Friday 26 May 2023

Weather: Cloud and drizzly rain over western Argyll through the day. Otherwise a dry and bright start, but all parts will see a good deal of cloud through the day with some patchy light rain or drizzle, this chiefly along coastal ranges. There's a chance that cloud may thin and break across the coastal southwest of the area in the afternoon.

Chance of cloud-free hill tops above 800m: 30%, best inland first thing, and perhaps across southern Kintyre, Arran and Jura in the afternoon.

Low Cloud and visibility: Widely poor in extensive low cloud down to 500 to 800 metres, and occasionally down to 200 metres across Mull and coastal Lochaber. Some occasional improvements across eastern Argyll and the Trossachs in the afternoon.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Met Office Aberdeen Meteorologist's View
Despite a bright start inland, widespread cloud by afternoon will lead to navigational difficulties.

Forecast for Saturday 27 May 2023
Weather: Much of the day will see a lot of low cloud together with occasional light rain, this mostly across Argyll and southern Lochaber. Dry and much brighter weather will spread southeastwards later in the afternoon and evening to leave a fine end to the day. Cold, strong and gusty westerly summits winds with notable wind chill.

Maximum wind: Westerly winds average speeds of 30 mph with gusts to 50 mph, speeds decreasing later in the day

Chance of cloud-free hill tops above 800m: 50%, best chance in the east and south of the area, and then more widely later in the day

Low Cloud and visibility: Poor in areas of cloud down to 500 to 800 metres in the morning, this chiefly across the north and west of the area. Cloud breaking in the later afternoon and lifting off all but highest tops with much improved visibility. Still some patchy cloud above 900 metres.

Temperature: **Glens:** Plus 7 rising to 14 Celsius
At 800m: Plus 8 Celsius, falling to 4 Celsius later in the day
Freezing level: Above summits falling to 1100 metres later in the day
